

# Safety Data Sheet According to Regulation (EC) No 1907/2006

I -10°C Special transformer Oil

| Version 3.0<br>Issue date: 18/01/2018<br>Revision date: 18/01/2018 | SDS Record Number: SINOPEC CCNT-Q-003   |
|--|---|
| Section 1 Identification of the substa                             | ance/mixture and of the company/undertaking   |
| 1.1 Product identifier:  |   |
| Identification on the label/Trade name:                            | I -10℃ Special transformer Oil  |
| Additional identification:   | Not available   |
| Identification of the product:                                     | See section 3   |
| Index Number:  | Not available   |
| REACH registration No.:  | Not available   |
| 1.2 Relevant identified uses of the subst                          | ance and uses advised against:  |
| 1.2.1 Identified uses:   |   |
| I-10 $^\circ C$ Special transformer Oil suita                      | able for insulation and cooling medium in the oil-immersed transformer.                 |
| 1.2.2 Uses advised against:  |   |
| Not available.   |   |
| 1.3 Details of the supplier of the safety d                        | ata sheet:  |
| Supplier(Only representative):                                     | -   |
| Supplier(Manufacturer):  | LUBRICANT COMPANY, SINOPEC CORP.  |
| Address:   | No. 6 Anning Zhuang West Road, Haidian District, Beijing, P.R. China Post number:100085 |
| Contact person(E-mail):  | csc.lube@sinopec.com  |
| Telephone:   | 0086-400-810-9886   |
| Fax:   | 0086-10-82410856  |
| 1.4 Emergency telephone Number:                                    |   |
| 0086-400-810-9886  |   |
| Available outside office hours?                                    | YES NO X  |
| Section 2 Hazards Identification                                   |   |
|  |   |

#### 2.1 Classification of the substance/mixture:

#### 2.1.1 Classification:

The mixture is classified as following according to REGULATION (EC) No 1272/2008:

| REGULATION (EC) No 1272/2008     |              |
|----------------------------------|--------------|
| Hazard classes/Hazard categories | Hazard codes |
| Aquatic Chronic 3                | H412         |

For full text of H- phrases: see section 2.2.

#### 2.2 label elements:

| Hazard Pictograms: | No hazard pictogram is used.                             |
|--------------------|--|
| Signal Word(S):    | No signal word is used.                                  |
| Hazard Statement:  | H412: Harmful to aquatic life with long lasting effects. |

#### SINOPEC 🥌 长城润滑油

Precautionary statement:

P273: Avoid release to the environment.

P501: Dispose of contents/container in accordance with local regulation.

#### 2.3 Other hazards:

Not available.

| Section 3 Composition/information on ingredients                     |                       |            |           |               |                |  |
|--|-----------------------|------------|-----------|---------------|----------------|--|
| Substance/Mixture:   | Mixture               |            |           |               |                |  |
| Ingredient(s):   |                       |            |           |               |                |  |
| Chemical Name  | Registration No.      | CAS No.    | EC No.    | Concentration | Classification |  |
| Hydrotreated light naphthenic distillate solvent extract (petroleum) | N/A                   | 64742-53-6 | N/A       | >40%          | Not available  |  |
| Distillates (petroleum), hydrotreated light paraffinic               | 01-2119487077-29-0041 | 64742-55-8 | 265-158-7 | <45%          | Not classified |  |
| Distillates(petroleum),solvent-refined light paraffinic              | 01-2119487067-30-0020 | 64741-89-5 | 265-091-3 | <15%          | Not classified |  |
| DBPC   | N/A                   | 128-37-0   | 204-881-4 | <0.4%         | H400 H410      |  |

#### Section 4 First aid measures

#### 4.1 Description of first aid measures:

In all cases of doubt, or when symptoms persist, seek medical attention.

#### 4.1.1 In case of inhalation:

No specific first aid measures are required. If exposed to excessive levels of material in the air, move the exposed person to fresh air. Get medical attention if coughing or respiratory discomfort occurs.

#### 4.1.2 In case of skin contact:

No specific first aid measures are required. As a precaution, remove clothing and shoes if contaminated. To remove the material from skin, use soap and water. Discard contaminated clothing and shoes or thoroughly clean before reuse.

#### 4.1.3 In case of eyes contact:

No specific first aid measures are required. As a precaution, remove contact lenses, if worn, and flush eyes with water.

#### 4.1.4 In case of ingestion:

No specific first aid measures are required. Do not induce vomiting. As a precaution, get medical advice.

#### 4.2 Most important symptoms and effects, both acute and delayed:

In the case of high temperature long-term inhalation of oil mist or vapors may cause respiratory irritation. Prolonged or repeated skin contact can cause irritation or inflammation of the skin. Eye contact can cause mild irritation to the eyes. Ingestion too much may lead to stomach irritation, vomiting and diarrhea.

#### 4.3 Indication of any immediate medical attention and special treatment needed:

If skin irritation or rash occurs, get medical advice/attention.

# Section 5 Fire-Fighting measures

#### 5.1 Extinguishing media:

| Suitable extinguishing media:        | Spray, foam, fire extinguishers, carbon dioxide fire extinguisher, dry powder fire          |  |  |
|--------------------------------------|---|--|--|
|                                      | extinguisher  |  |  |
| Unsuitable extinguishing media:      | Do not water.   |  |  |
| 5.2 Special hazards arising from the | This product has a flash point over $150^\circ\!\mathrm{C}$ and it belongs to non-dangerous |  |  |
| substance or mixture                 | products. When it meets fever case, the fire and strong oxidants, it can cause a            |  |  |
|                                      | fire. A complex mixture of airborne solids, liquids, and gases including carbon             |  |  |

monoxide, carbon dioxide, and unidentified organic compounds will be evolved when this material undergoes combustion.

#### 5.3 Advice for firefighters:

Must wear breathing apparatus in confined spaces when close to the ignition point.

#### Section 6 Accidental release measures

#### 6.1 Personal precautions, protective equipment and emergency procedures;

| 6.1 Personal precautions, protective equipme | and emergency procedures.   |
|--|---|
| 6.1.1 For non-emergency personnel:           | Cut off the fire source, immediately contact the operating staff. Keep unrelated people rapidly evacuating to safe areas and isolation. As far as possible to cut off   |
|  | the source of leakage, prevent entering into sewers, drains, water and space.   |
|  | Refer to Chapter 8 of MSDS or the relevant fire-fighting procedures.  |
| 6.1.2 For emergency responders:              | Wear an appropriate NIOSH/MSHA approved respirator if vapor is generated.   |
| 6.2 Environmental Precautions:               | Before operating staff arrive at the scene, as much as possible to make the spilled material under control. For a small amount of leakage, use sawdust, sand, soil or other adsorbent to collect leaking liquid and place it in a sealed, liquid-proof container, waiting to be processed; For a large number of leakage, build a causeway or dig to collect it, Ensure that it does not flow into the sewers, rivers, water and lowlands. Place spilled material in appropriate container for disposal. Report to relevant departments when the soil and plant was polluted.       |
| 6.3 Methods for Containment and Cleaning     | For a large number of leakage, Pump it into a container with a vacuum pump; For   |
| up:  | a small amount of leakage, use sawdust, sand, soil, oil-absorbing cotton or other<br>adsorbent to prevent proliferation and load it into the sealed container for<br>processing; For land leakage, take protective measures and cut off the sources of<br>pollution, reduce to a minimum for the pollution of surface water; For waterway<br>leakage, Immediately use the oil boom to prevent the loss of oil, warn the<br>surrounding vessel and, when necessary, use suitable dispersants. If significant<br>spillages can not be processed, should inform the local authorities. |
| 6.4 Reference to other sections:             | See Section 7 for information on safe handling.   |

#### See Section 7 for information on safe handling.

See Section 8 for information on personal protection equipment.

See Section 13 for information on disposal.

#### Section 7 Handling and storage

| 7.1 Precautions for safe handling:                                |   |
|---|---|
| 7.1.1 Protective measures:  | Avoid long or repeated contact with skin, if contact, thoroughly wash it. If you are at risk of inhaling steam, spray or smoke, Please use local exhaust ventilation device. When transport, please lightly touch it to prevent the package and containers destroy.   |
| 7.1.2 Advice on general occupational<br>hygiene:                  | Do not eat, drink and smoke in work areas. Wash hands after use. Remove contaminated clothing and protective equipment before entering eating areas.  |
| 7.2 Conditions for safe storage, including any incompatibilities: | Keep the container sealing, do not store it into open container or container without labels. Keep it cool, dry and ventilate. Keep it from strong oxidant, fire, heat source and inflammable. Store it in normal temperature. Empty container may leave partly products, do not cut or weld, do not leave it in fire or high temperature. |
| 7.3 Specific end use(s):  | Not applicable.   |

#### 7.3 Specific end use(s):

**Section 8 Exposure Controls/Personal Protection** 

#### 8.1 Control parameters:

#### 8.1.1 Occupational exposure limits:

| Substance |        |         | Occupational Exposure Limit Value |        | Occupation | nal Exposure    | Limit Value |
|-----------|--------|---------|-----------------------------------|--------|------------|-----------------|-------------|
|           |        |         | (8-hour reference period)         |        | (15-minute | reference perio | d           |
|           | EINECS | CAS No. | ppm                               | mg/ m3 | ppm        | mg/ m3          | Notes       |

|                            | No.       |          |   |    |   |   |   |
|----------------------------|-----------|----------|---|----|---|---|---|
| 2,6-Ditertiary-butyl-para- | 204-881-4 | 128-37-0 | - | 10 | - | - | - |
| cresol                     |           |          |   |    |   |   |   |

8.1.2 Additional exposure limits under the Not available.

#### conditions of use:

8.1.3 DNEL/DMEL and PNEC-Values:

Not available.

#### 8.2 Exposure controls:

#### 8.2.2 Individual protection measures, such as personal protective equipment:

| Eye/face protection:                   | No special eye protection is normally required. Where splashing is possible, wear      |  |  |  |  |  |
|--|--|--|--|--|--|--|
|  | safety glasses with side shields as a good safety practice.                            |  |  |  |  |  |
| Hand protection:                       | Suggested materials for protective gloves include: Neoprene, Nitrile Rubber.           |  |  |  |  |  |
| Body protection:                       | No special protective clothing is normally required. Where splashing is possible,      |  |  |  |  |  |
|  | select protective clothing depending on operations conducted physical                  |  |  |  |  |  |
|  | requirements and other substances in the workplace.                                    |  |  |  |  |  |
| Respiratory protection:                | No respiratory protection is normally required. No respiratory protection is           |  |  |  |  |  |
|  | ordinarily required under normal conditions of use. In accordance with good            |  |  |  |  |  |
|  | industrial hygiene practices, precautions should be taken to avoid breathing of        |  |  |  |  |  |
|  | material. If user operations generate an oil mist, determine if airborne               |  |  |  |  |  |
|  | concentrations are below the occupational exposure limit for mineral oil mist. If not, |  |  |  |  |  |
|  | wear an approved respirator that provides adequate protection from the measured        |  |  |  |  |  |
|  | concentrations of this material. For air-purifying respirators use a particulate       |  |  |  |  |  |
|  | cartridge. Use a positive pressure air-supplying respirator in circumstances where     |  |  |  |  |  |
|  | air-purifying respirators may not provide adequate protection.                         |  |  |  |  |  |
| Thermal hazards:                       | Wear suitable protective clothing to prevent heat.                                     |  |  |  |  |  |
| 8.2.3 Environmental exposure controls: | Avoid discharge into the environment.  |  |  |  |  |  |
|  | According to local regulations, Federal and official regulations.                      |  |  |  |  |  |

#### Section 9 Physical and chemical properties

### 9.1 Information on basic physical and chemical properties:

| Appearance:                                | Oil liquid                              |
|--|---|
| Colour:                                    | Transparent, colorless to pale yellow   |
| Odour:                                     | Odorless/Light petroleum.               |
| Odour threshold:                           | Not available                           |
| pH:  | Not available                           |
| Melting point/range (℃):                   | Not available                           |
| Pour point:                                | -36℃ (typical data)                     |
| Boiling point/range (℃):                   | > <b>250</b> ℃                          |
| Flash point (°C):                          | 149℃ (closed cup) <i>(typical data)</i> |
| Evaporation rate:                          | Not available                           |
| Flammability limit - lower (%):            | Not available                           |
| Flammability (solid, gas):                 | Not available                           |
| Ignition temperature (°C):                 | Not available                           |
| Upper/lower flammability/explosive limits: | Not available                           |
| Vapour pressure (40℃):                     | <5kPa                                   |
| Vapour density:                            | Not available                           |
|  |   |

| Density:  | 861.5kg/m <sup>3</sup> (20°C) <i>(typical data)</i>  |  |  |  |  |
|---|--|--|--|--|--|
| Bulk density (kg/m <sup>3</sup> ):                                    | Not available  |  |  |  |  |
| Water solubility (g/l):   | Insoluble in water   |  |  |  |  |
| n-Octanol/Water (log Po/w):   | Not available  |  |  |  |  |
| Auto-ignition temperature:  | > 270 °C   |  |  |  |  |
| Decomposition temperature:  | > 280 °C   |  |  |  |  |
| Kinematic viscosity:  | 9.692 mm/s <sup>2</sup> at 40°C <i>(typical data)</i>  |  |  |  |  |
| Explosive properties:   | Not available  |  |  |  |  |
| Oxidising properties:   | Not available  |  |  |  |  |
| Molecular Formula:  | Not available  |  |  |  |  |

#### Section 15 Regulation information

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture:

Relevant information regarding authorization:

Not applicable.

**Relevant information regarding restriction:** Other EU regulations:

Not applicable.

Employment restrictions concerning young person must be observed. For use only by technically qualified individuals.

Other National regulations:

15.2 Chemical Safety Assessment has been carried out?

#### Not applicable YES

NO

Х

**Section 16 Other information** 

#### 16.1 Indication of changes:

Version 1.0 Amended by (EU) 2015/830

#### 16.2 Training instructions:

Not applicable.

#### 16.3 Further information:

This information is based upon the present state of our knowledge. This SDS has been compiled and is solely intended for this product.

#### 16.4 Notice to reader:
